

# What Will It Take To Make This Program Work?

## ❖ School board approval

The program will be presented and explained to the school board. Packets of information will be given to each member.

## ❖ Dedicated administrative involvement

This program is proven to work within schools where administration is committed to the program and active in the implementation process and follow through.

## ❖ Dedicated teacher involvement

The success of the program depends on dedicated advisors who will work with students to promote the program. It is important that all teachers and staff have a working knowledge of the program and will help encourage students to become members.

## ❖ Active SADD Club

An established SADD Club will reinforce the core elements of the program. It is recommended SADD members join the program. These students have already made the commitment to a healthy lifestyle and will serve as positive role models for the remainder of the student body.

## ❖ Active SAP Team

The SAP Team will offer assistance to any student who belongs to the program who may need it. Also, this program can be recommended to at risk students.

## ❖ Parent Involvement

Parents will need to sign permission forms for their children to participate in the program. Parents will be contacted immediately following a screening. This program will serve to open the lines of healthy communications about ATOD (Alcohol, Tobacco, and Other Drugs). Families will become more knowledgeable about the seriousness of illicit drug use.

## ❖ Prevention programs

Programs promoting healthy decisions will be provided to students, faculty, administration, parents, and the entire community.
